

How to integrate public service and advocacy into your graduate education and post-graduate careers

A panel of graduate students will discuss their public service and share what they learned at the 2023 AAAS workshop "Catalyzing Advocacy in Science and Engineering":

Angelica Barreto, Ph.D. student in Cell and Developmental Biology

Simone Boyd, Ph.D. student in Clinical Psychology

Alysse Moldawer, Ph.D. student in Anthropology

Levben Parson, Ph.D. student in Earth and Planetary Sciences

Topics include:

- How to impact government policy, including policies that determine funding priorities
- How to advocate for critical change in areas such as mental health, education, the environment, climate, and opportunities for under-served populations
- Strategies for communicating with policy makers and the general public: tailoring language to the audience
- The importance of connecting the humanities to the traditional STEM disciplines
- How easy it is to visit a congressional office and have your voice heard
- Available pathways to post-graduation careers in advocacy and public service
- Four things that may surprise you about policy-making at the federal level

WEDS., APRIL 26, 2023
