

National Science Foundation (NSF), National Professional Science Master's Association (NPSMA) and Council of Graduate Schools (CGS) present the WORKSHOP

STEM Master's Individual Development Plans as an Essential Tool in Workforce Development

Wednesday, November 10, 2021

This workshop is supported by the NSF (Award Abstracts #1940221, #193934) through a collaborative grant to the NPSMA (P.I. Deborah Silver, Rutgers) and CGS (P.I. Hironao Okahana). Prevalent in PhD and Postdoctoral programs, IDPs are not at all common in science master's programs. The short time frames to completion and workforce development aspects of STEM master's degrees present distinctive conditions that call for the creation of specialized IDPs for their students. The goal of the workshop is to share what is known about IDPs, to learn how to apply them, and to explore elements for a STEM MS IDP template.

Session Time	Topic/Speaker
	Weather permitting, the meals, breaks and some table discussions will take place outdoor next to the pool. All other sessions will be in the main event space in the Gasparilla ballroom.
